

Website Building: Basic Layout

CSS – First web page - Landing page

The following exercise contains the following subjects:

- CSS Grid

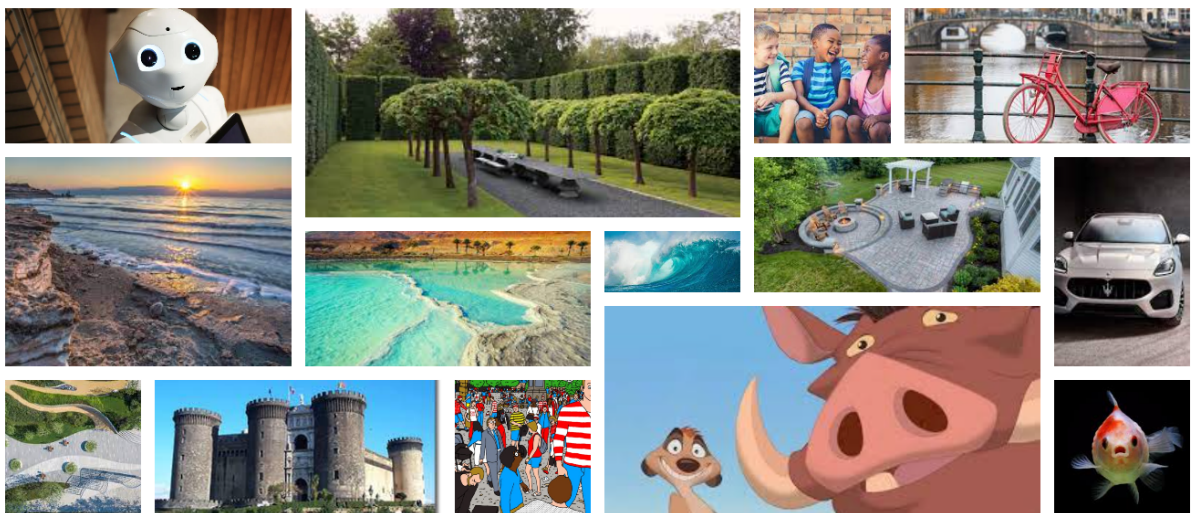

Instructions

One of the most useful things we can create with CSS Grid is a gallery. Like in [Pinterest](#).

Let's create an image gallery.

1. Download this [template](#).
2. Create a grid of images using the images you get from the template.

For example:

Bonus:

Make it responsive ([example](#))
