

Website Building: Basic Layout

HTML - Positioning

The following exercise contains the following subjects:

- Positioning

Instructions

We want to position the small box on top of the bigger box like this:

Having the following HTML:

```
<body>
  <div id="outer">
    <div id="inner"></div>
  </div>
</body>
```

and the following CSS:

```
#outer {  
  width: 100px;  
  height: 100px;  
  background: darkcyan;  
  margin: 50px;  
}  
  
#inner {  
  width: 50px;  
  height: 50px;  
  background: lightgreen;  
  position: absolute;  
  top: 10px;  
}
```

We have set the inner div with position absolute and gave it a top of 10px, but it is not working.

Why?

1. explain in your own words what is the problem.
2. fix the code using the positions we've learned.
