Front-end development: Basics

JavaScript – declaring functions 2

The following exercise contains the following subjects:

- Declaring functions 2

Instruction

Copy the code below to your computer, answer the questions on the file, and submit.

```
/*
    JavaScript - Declaring Functions

    The following exercise contains the following
subjects:
        * functions

    Instructions
        * Please reformat the following function
expressions to IIFE functions.
        * Please reformat the following function
declarations in two ways, explicit return and implicit
return functions.

    Submit the file to Hive

*/
```

```javascript
// From function declarations to explicit and implicit
return functions (one of each).

function welcome() {
    let welcome = 'Welcome to Appleseeds Bootcamp!';
    return welcome;
}

function power(a) {
    let myNumber = a;
    let result = Math.pow(myNumber, 2);
    return result;
}

// From function expressions to IIFE functions.
const squareRoot = a => Math.sqrt(a);

const randomNumbers = (a, b) => Math.random() * (a - b) +
b;
```
